SEDPOWER Solar Street Lights are immensely useful as stand alone source of light on streets and in premises, gardens and industrial complexes.

- * These conform to MNES specifications.
- * It is a packaged solar powered outdoor lighting system which provides easy and quick way of tapping the solar power.
- * The systems are very easy to install needing no special skills, tools or expertise.
- * They provide a steady source of light in areas where conventional sources of mains utility are erratic, unreliable or unobtainable.
- * They are independent and self-contained and hence need no extra wiring or cables.
- * They save on costly transmission losses

SALIENT FEATURES:

- Ø Bright light of 900 Lumens from 11W CFL
- Ø Weatherproof enclosure
- Ø Automatic on-off at dusk and dawn respectively.
- Ø Special solar grade battery of 12V/75Ah
- Ø High efficiency inverter with preheat circuitry for 4 pin CFL
- Ø Charge controller suitable to pump in upto 6A of charging current
- Ø Protections against reverse connection of battery, over charge and deep discharge.
- Ø Two solar panels of 37W each
- Ø 3 No-Sun days autonomy
